

# How to Install Your Digital Edition in Three Easy Steps

## Step 1:

Click the secure link sent via e-mail to begin the download process. When prompted, select the "Save" option, and choose a location on your computer to save the file.

## Step 2:

Once the download has completed, locate the file on your computer and double click on the icon. Extract or unzip the files to a folder on your computer (consult the instructions for your unzipping software for information on how to unzip the files).

If you do not have unzipping software installed on your computer, we recommend performing a search for "free unzipping software" on your favorite search engine.

## Step 3:

Open the folder containing the unzipped files, and double click on the "Offline" icon (PC users) or the "Offline.app" icon (MAC users) to launch your digital edition.
